Primary School Certificate. Obtained from God's Way Nursery/Primary school. Jos Plateau State. (2002-2008)

### KEY SKILLS

- HTML5

### PROFESSIONAL EXPERIENCE

#### Full Stack Software Development: Laundry Management System (LMS, 2023);

I developed a Laundry Management System for a friends business in Jos Plateau State. The website was design to display laundry services with the functionality of allowing customers place laundry orders online and have their orders confirmed and feedback is sent to their respective dashboards. The system also generate weekly and monthly sales report.

#### Full Stack Software Development: Students Final Year Project in Plateau State University Bokkos. (2024)

I developed a web app object detection system with local items in Jos South LGA of plateau state. The web app is to detect and classify local object of interest in an image.it can upload an image, then the image is trained and tested using machine learning

- CSS3
- Bootstrap
- JavaScript
- PHP
- MySQL
- Wordpress

## ADDITIONAL SKILLS

---

- Excellent writing skills with the ability to write compelling grant proposals and create picture graphics to enhance communication.
- Computer literacy in MS word, power point, corral draw and excel.
- Jovial and humble in building relevant relationships
- Excellent communication and interpersonal skills with the ability to engage stakeholders at all levels, manage multiple projects, deadlines and priorities success effectively
- Conversant with Xampp Control Panel
- Ability and willingness to work in any community and cultural background
- Willingness and capacity to be flexible and accommodating when faced with difficult and challenging situation and circumstances at all levels
- Flexible, proactive, self-motivated as well as a good team player able to work with minimum supervision.

## WORKSHOP AND TRAININGS

algorithms; when it is done testing and it is sure of the image, it then displays the detected image output to the user showing bounding boxes around each object detected with their classified names and positions. The computer vision system can also make use of webcams to capture real time images and detect them as well.

### **Frontend Software Development: Phone System in Uganda Christian University. (2022)**

I took part in the development of my school phone system; the system was proposed to register student users and have them login to their respective dashboards to access different file formats that is uploaded by the school lecturers through the phone system admin. I personally volunteered to create two web pages to improve the system functionality. The first page was for the admin user to help/him or her upload all kinds of file extensions with the privilege to download and delete the uploaded file, while the other page was for the student users to enable them download the uploaded file only.

### **Full Stack Development: Student Final Year Project in Uganda Christian University. (2022)**

I helped my business computing friend in school to develop a Voting Management System for his final year project. The proposed system was to manage students voting process in the business computing department. It registers student voters and confirm the registration of a voter using their registration numbers. The system can register candidates that are to be voted with their images and have voters vote for their desired candidate. The system admin manages all the processes, he or she can generate voting results.
